

# 2273 & 221 Series Connector Adapters

The WAGOBOX 2273 and 221 connector adapters should be used when using WAGO 2273 and 221 series connectors with the WAGOBOX or WAGOBOX XLA to ensure compliance with BS EN 60670-22.

The adapters are intended to be fitted into the connector receptacles inside the WAGOBOX & WAGOBOX XLA. Each adapter provides a slot designed to hold the appropriate connector type safely and securely preventing excessive movement and inadvertent extraction of the connector or connected wire.

The adapters are supplied flat. To use, fold into a rectangular shape with the side fins facing inward. Insert into the connector receptacle.

Shown with 2273 adapters and connectors in position.
